WARNUNG: Angemessene Belüftung gewährleisten

Damit Flüssigkeiten bequem abfließen können, müssen Sie einen Mindestabstand von 40 mm zwischen dem Ablenkblech und dem Boden des Kochfeldes einhalten. Beachten Sie die nachstehenden Anforderungen.

- ⚠ An der Außenseite des Kochfeldes befinden sich Lüftungsöffnungen. SIE MÜSSEN darauf achten, dass diese Öffnungen nicht durch die Arbeitsplatte blockiert werden, wenn Sie das Kochfeld in Position bringen.
- ⚠ • Beachten Sie, dass der Klebstoff, der das Kunststoff- oder Holzmaterial mit den Möbeln verbindet, einer Temperatur von mindestens 150 °C standhalten muss, um ein Ablösen der Verkleidung zu vermeiden.
- Die Rückwand, angrenzende und umgebende Flächen müssen daher einer Temperatur von 90 °C standhalten.

DE

Vor der Installation des Kochfeldes beachten

- Die Arbeitsfläche ist quadratisch und eben, und keine Bauteile dürfen den Platzbedarf stören.
- Die Arbeitsfläche besteht aus einem hitzebeständigen und isolierten Material.
- Wenn das Kochfeld über einem Backofen installiert wird, verfügt der Ofen über einen eingebauten Kühlventilator.
- Die Installation muss alle Anforderungen an das Abstandsmaß sowie die geltenden Normen und Vorschriften erfüllen.
- Ein geeigneter Trennschalter, der eine vollständige Trennung vom Stromnetz ermöglicht, ist in die feste Verkabelung integriert, um den örtlichen Verkabelungsvorschriften und zu entsprechen.
- Der Trennschalter muss ein zugelassener Typ sein und einen allpoligen Spalt von 3 mm aufweisen (oder in allen aktiven Leitern, wenn die örtlichen Verkabelungsvorschriften diese Änderung der Anforderungen zulassen).
- Der Trennschalter ist bei installiertem Kochfeld für den Kunden leicht zugänglich.
- Bei Zweifeln an der Installation konsultieren Sie die örtliche Baubehörde und deren Statuten.
- Sie verwenden hitzebeständige und leicht zu reinigende Oberflächen (z.B. Keramikfliesen) für die Wandflächen und rund um das Kochfeld.

Nach der Installation des Kochfeldes beachten

- Das Netzkabel wird nicht durch Schranktüren oder Schubladen geführt.
- Es gibt einen ausreichenden Frischluftstrom von außerhalb des Schanks zum Boden des Kochfeldes.
- Wird das Kochfeld über einem Schubladen- oder Schrankraum installiert, muss unterhalb des Kochfeldes eine Wärmeschutzbarriere installiert werden.
- Der Trennschalter ist für den Kunden leicht zugänglich.

Vor dem Anbringen der Befestigungsklammern

Das Gerät sollte auf eine stabile, glatte Oberfläche gestellt werden (Verpackung verwenden).
Wenden Sie keine Gewalt an den Steuerelementen an, die aus dem Kochfeld herausragen.

VORSICHT

1. Das Induktionskochfeld muss von qualifiziertem Personal oder Technikern installiert werden.
Wir haben Fachleute zu Ihren Diensten. Führen Sie die Installation nicht selbst durch.
2. Das Kochfeld wird nicht direkt über einer Geschirrspülmaschine, einem Kühlschrank, Gefrierschrank, einer Waschmaschine oder einem Wäschetrockner installiert, da die Feuchtigkeit die Kochfeldelektronik beschädigen kann
3. Das Induktionskochfeld ist so zu installieren, dass eine bessere Wärmestrahlung gewährleistet werden kann, um seine Zuverlässigkeit zu erhöhen.
4. Die Wand und die Arbeitsfläche über der Kochzone müssen der Hitze standhalten.
5. Um Beschädigungen zu vermeiden, müssen die Sandwichschicht und der Klebstoff hitzebeständig sein.
6. Ein Dampfreiniger darf nicht zur Reinigung verwendet werden.

Kochfeld am Stromnetz anschließen

 Dieses Kochfeld darf nur von einer entsprechend qualifizierten Person am Stromnetz angeschlossen werden.

Bevor Sie das Kochfeld am Stromnetz anschließen, überprüfen Sie:

1. Das haustechnische Verkabelungssystem ist für die vom Kochfeld aufgenommene Leistung geeignet.
2. Die Spannung entspricht dem auf dem Typenschild angegebenen Wert
3. Die Abschnitte der Stromversorgungskabel sind gegen die auf dem Typenschild angegebene Belastung beständig.

Verwenden Sie zum Anschluss des Kochfeldes am Stromnetz keine Adapter, Reduzierstücke oder Abzweigvorrichtungen, da diese zu Überhitzung und Feuer führen können.

Das Netzkabel darf keine heißen Teile berühren und muss so verlegt werden, dass seine Temperatur zu keinem Zeitpunkt 75 °C übersteigt.

 Überprüfen Sie mit einem Elektriker, ob die Hausinstallation ohne Änderungen geeignet ist.
Änderungen dürfen nur von einer Elektrofachkraft vorgenommen werden.

DE

- ⚠ • Wenn die Gesamtzahl der Heizelemente des von Ihnen gewählten Geräts nicht weniger als 4 beträgt, kann das Gerät direkt am Stromnetz angeschlossen werden, und zwar über einen einphasigen Stromanschluss, wie nachstehend dargestellt.
- Wenn das Kabel beschädigt ist oder ersetzt werden muss, muss dies von einem Kundendienstmitarbeiter mit geeignetem Werkzeug durchgeführt werden, um Unfälle zu vermeiden.
- Wird das Gerät direkt an das Stromnetz angeschlossen, muss ein omnipolarer Leistungsschalter mit einer Mindestöffnung von 3 mm zwischen den Kontakten installiert werden.
- Der Installateur muss sicherstellen, dass der korrekte elektrische Anschluss hergestellt wurde und die Sicherheitsvorschriften eingehalten werden.
- Das Kabel darf nicht gebogen oder zusammengedrückt werden.
- Das Kabel darf nur von autorisierten Technikern regelmäßig überprüft und ausgetauscht werden.

ENTSORGUNG UND RECYCLING

Wichtige Umwelthinweise

Übereinstimmung mit der WEEE-Richtlinie über Elektro- und Elektronik-Altgeräte:

Dieses Produkt entspricht der WEEE-Richtlinie der EU (2012/19/EU). Dieses Produkt ist mit einem Categoriesymbol für Elektro- und Elektronik-Altgeräte (WEEE) gekennzeichnet.

Dieses Symbol weist Sie darauf hin, dass dieses Produkt am Ende seiner Lebensdauer nicht mit dem gewöhnlichen Haushaltsmüll entsorgt werden darf. Das Altgerät muss bei einer offiziellen Sammelstelle für das Recycling von Elektro- und Elektronikgeräten abgegeben werden. Für Informationen zu den Standorten dieser Sammelstellen wenden Sie sich bitte an Ihre örtliche Behörde oder den Händler, bei dem Sie das Produkt gekauft haben. Jeder Haushalt spielt eine wichtige Rolle bei der Rückgewinnung von Rohstoffen und dem Recycling von Altgeräten. Die ordnungsgemäße Entsorgung von Altgeräten hilft bei der Vermeidung möglicher negativer Folgen für die Umwelt und die menschliche Gesundheit.

DE

Übereinstimmung mit der RoHS-Richtlinie

Das von Ihnen erworbene Produkt entspricht der RoHS-Richtlinie der EU (2011/65/EU). Es enthält keine der in dieser Richtlinie aufgeführten schädlichen und verbotenen Materialien.

Informationen zur Verpackung

Das Verpackungsmaterial für dieses Produkt ist aus wiederverwertbaren Materialien hergestellt und entspricht den nationalen Umweltvorschriften. Entsorgen Sie dieses Verpackungsmaterial nicht über den Hausmüll oder andere Abfälle. Bringen Sie es zu den von den örtlichen Behörden bestimmten Sammelstellen für Verpackungsmaterial.

HINWEISE ZUM DATENSCHUTZ

Für die Erbringung der mit dem Kunden vereinbarten Dienstleistungen verpflichten wir uns zur uneingeschränkten Einhaltung aller Bestimmungen des anwendbaren Datenschutzrechts, gemäß Vereinbarung mit den Ländern, in denen die Dienstleistungen für den Kunden erbracht werden, sowie, soweit anwendbar, der EU-Datenschutzgrundverordnung (DSGVO).

Im Allgemeinen dient unsere Datenverarbeitung der Erfüllung unserer vertraglichen Verpflichtung Ihnen gegenüber und aus Gründen der Produktsicherheit, zur Wahrung Ihrer Rechte im Zusammenhang mit Garantie- und Produktregistrierungsfragen.

In einigen Fällen, aber nur wenn ein angemessener Datenschutz gewährleistet ist, können personenbezogene Daten an Empfänger außerhalb des Europäischen Wirtschaftsraums übermittelt werden.

Weitere Informationen erhalten Sie auf Anfrage. Sie können unseren Datenschutzbeauftragten über **MideaDPO@midea.com** kontaktieren. Um Ihre Rechte auszuüben, wie z. B. das Recht auf Widerspruch gegen die Verarbeitung Ihrer personenbezogenen Daten zu Direktmarketingzwecken, kontaktieren Sie uns bitte über **MideaDPO@midea.com**.

EN

WARNING: Ensuring Adequate Ventilation

In order to drain liquids conveniently, it is necessary to keep a minimum distance of 40mm between the baffle and the bottom of the hob. Follow the requirements below.

- ⚠ There are ventilation holes around outside of the hob. YOU MUST ensure these holes are not blocked by the worktop when you put the hob into position.
- ⚠ • Be aware that the glue that join the plastic or wooden material to the furniture, has to resist to temperature not below 150°C, to avoid the unstuck of the paneling.
- The rear wall, adjacent and surrounding surfaces must therefore be able to withstand an temperature of 90°C.

EN

Before Installing the Hob, Make Sure That

- The work surface is square and level, and no structural members interfere with space requirements.
- The work surface is made of a heat-resistant and insulated material.
- If the hob is installed above an oven, the oven has a built-in cooling fan.
- The installation will comply with all clearance requirements and applicable standards and regulations.
- A suitable isolating switch providing full disconnection from the mains power supply is incorporated in the permanent wiring, mounted and positioned to comply with the local wiring rules and regulations.
- The isolating switch must be of an approved type and provide a 3 mm air gap contact separation in all poles (or in all active [phase] conductors if the local wiring rules allow for this variation of the requirements).
- The isolating switch will be easily accessible to the customer with the hob installed.
- You consult local building authorities and by-laws if in doubt regarding installation.
- You use heat-resistant and easy-to-clean finishes (such as ceramic tiles) for the wall surfaces surrounding the hob.

After Installing the Hob, Make Sure That

- The power supply cable is not accessible through cupboard doors or drawers.
- There is adequate flow of fresh air from outside the cabinetry to the base of the hob.
- If the hob is installed above a drawer or cupboard space, a thermal protection barrier is installed below the base of the hob.
- The isolating switch is easily accessible by the customer.

Before Locating the Fixing Brackets

The unit should be placed on a stable, smooth surface (use the packaging). Do not apply force onto the controls protruding from the hob.

CAUTIONS

1. The induction hotplate must be installed by qualified personnel or technicians. We have professionals at your service. Please never conduct the operation by yourself.
2. The hob will not be installed directly above a dishwasher, fridge, freezer, washing machine or clothes dryer, as the humidity may damage the hob electronics
3. The induction hotplate shall be installed such that better heat radiation can be ensured to enhance its reliability.
4. The wall and induced heating zone above the table surface shall withstand heat.
5. To avoid any damage, the sandwich layer and adhesive must be resistant to heat.
6. A steam cleaner is not to be used.

Connecting the Hob to the Mains Power Supply

 This hob must be connected to the mains power supply only by a suitably qualified person. Before connecting the hob to the mains power supply, check that:

1. The domestic wiring system is suitable for the power drawn by the hob.
 2. The voltage corresponds to the value given in the rating plate
 3. The power supply cable sections can withstand the load specified on the rating plate.
- To connect the hob to the mains power supply, do not use adapters, reducers, or branching devices, as they can cause overheating and fire.

The power supply cable must not touch any hot parts and must be positioned so that its temperature will not exceed 75°C at any point.

 Check with an electrician whether the domestic wiring system is suitable without alterations. Any alterations must only be made by a qualified electrician.

EN

- ⚠ If the total number of heating unit of the appliance you choose is not less than 4, the appliance can be connected directly to the mains by single-phase electric connection, as shown below.
- If the cable is damaged or to be replaced, the operation must be carried out the by after-sale agent with dedicated tools to avoid any accidents.
- If the appliance is being connected directly to the mains an omnipolar circuit-breaker must be installed with a minimum opening of 3mm between contacts.
- The installer must ensure that the correct electrical connection has been made and that it is compliant with safety regulations.
- The cable must not be bent or compressed.
- The cable must be checked regularly and replaced by authorised technicians only.

DISPOSAL AND RECYCLING

Important instructions for environment

Compliance with the WEEE Directive and Disposing of the Waster Product:

This product complies with EU WEEE Directive (2012/19/EU). This product bears a classification symbol for waster electrical and electronic equipment (WEEE).

This symbol indicates that this product shall not be disposed with other household wastes at the end of its service life. Used device must be returned to official collection point for recycling of electrical electronic devices. To find these collection systems please contact to your local authorities or retailer where the product was purchased. Each household performs important role in recovering and recycling of old appliance. Appropriate disposal of used appliance helps prevent potential negative consequences for the environment and human health.

Compliance with RoHS Directive

The product you have purchased complies with EU RoHS Directive (2011/65/EU). It does not contain harmful and prohibited materials specified in the Directive.

EN

Package information

Packaging materials of the product are manufactured from recyclable materials in accordance with our National Environment Regulations. Do not dispose of the packaging materials together with the domestic or other wastes. Take them to the packaging material collection points designated by the local authorities.

DATA PROTECTION NOTICE

For the provision of the services agreed with the customer, we agree to comply without restriction with all stipulations of applicable data protection law, in line with agreed countries within which services to the customer will be delivered, as well as, where applicable, the EU General Data Protection Regulation (GDPR).

Generally, our data processing is to fulfil our obligation under contract with you and for product safety reasons, to safeguard your rights in connection with warranty and product registration questions.

In some cases, but only if appropriate data protection is ensured, personal data might be transferred to recipients located outside of the European Economic Area.

Further information are provided on request. You can contact our Data Protection Officer via **MideaDPO@midea.com**. To exercise your rights such as right to object your personal data being processed for direct marketing purposes, please contact us via **MideaDPO@midea.com**.

To find further information, please follow the QR Code.

AGRADECIMIENTOS

¡Gracias por elegir Midea! Antes de utilizar su nuevo dispositivo Midea, lea atentamente este manual para asegurarse de que sabe cómo manejar las características y funciones que le ofrece su nuevo electrodoméstico de forma segura.

ES

ADVERTENCIA: Garantizar una ventilación adecuada

Para drenar convenientemente los líquidos, es necesario mantener una distancia mínima de 40 mm entre el deflector y el fondo de la placa de cocción. Siga los siguientes requisitos:

- ⚠ Todo alrededor del exterior de la hornilla, hallará orificios para la ventilación. DEBE asegurarse de que tales orificios nunca vayan a quedar obstruidos por la superficie de trabajo una vez usted coloque la hornilla en su sitio.
- ⚠ • Tenga en cuenta que el pegamento empleado para unir el material plástico o de madera al mueble deberá resistir una temperatura no menor a los 150 °C, a fin de que no se despeguen los paneles.
- Por lo tanto, la pared posterior, las superficies adyacentes y las de alrededor deben ser capaces de soportar una temperatura de 90 °C.

Antes de instalar la hornilla, asegúrese de que:

- La superficie de trabajo esté encuadrada y nivelada, y de que asimismo ningún componente estructural interfiera con los requisitos en materia de espacio.
- La superficie de trabajo esté hecha de un material aislante y resistente al calor.
- Si instala la hornilla sobre un horno, de que el horno tenga incorporado un ventilador de refrigeración.
- La instalación cumpla con todos los requisitos en términos de espacio, así como con todos los estándares y reglamentaciones vigentes.
- Se incorpore en el cableado permanente un interruptor adecuado de aislamiento que ofrezca una desconexión absoluta de la red de suministro eléctrico, el cual deberá quedar montado y posicionado de modo que cumpla con las normas y reglamentaciones locales en materia de cableado.
- El interruptor de aislamiento sea de un tipo aprobado y ofrezca una separación entre contactos de unos 3 mm en todos los polos (o en todos los conductores [de fase] activos, si las reglas locales en materia de cableado permiten tal variación en los requisitos).
- El cliente pueda acceder con facilidad a dicho interruptor de aislamiento una vez la hornilla ya esté instalada.
- Consultar con las autoridades -así como todos los estatutos- locales en materia de construcción en caso de duda acerca de la instalación.
- Utilizar acabados resistentes al calor y fáciles de limpiar (tales como azulejos de cerámica) en la superficie de las paredes de alrededor de la hornilla.

Tras instalar la hornilla, asegúrese de que:

- No se pueda acceder al cable de alimentación a través de puertas o cajones de la alacena.
- Corra un flujo adecuado de aire fresco desde el exterior del mueble hasta la base de la hornilla.
- Si la hornilla se instala sobre un cajón o mueble, de que se instale una barrera de protección térmica por debajo de la base de la hornilla.
- El interruptor de aislamiento quede colocado de forma tal que resulte accesible para el cliente.

Antes de ubicar los soportes de sujeción

El equipo debe ser colocado sobre una superficie estable y suave (use el embalaje). No ejerza ninguna fuerza sobre los controles que sobresalen de la hornilla.

Avisos

1. La hornilla de inducción deberá ser instalada por un técnico o bien por personal calificado. Contamos con profesionales a su servicio. No realice nunca dicha operación por sí mismo.
2. La hornilla no será instalada directamente encima de un lavavajillas, refrigerador, congelador, lavadora o secadora de ropa, debido a que la humedad proveniente de ellos puede dañar los componentes electrónicos de la hornilla.
3. La hornilla de inducción será instalada de manera tal que se pueda garantizar una mejor radiación de calor a fin de contribuir a su fiabilidad.
4. La pared y la zona de cocción por inducción sobre la superficie de la mesa deberán resistir el calor.
5. A fin de evitar cualquier daño, la capa intermedia y el adhesivo deberán ser resistentes al calor.
6. No se debe utilizar un limpiador a vapor.

Conexión de la hornilla con la red de suministro eléctrico

-  Esta hornilla deberá ser conectada a la red de suministro eléctrico únicamente por una persona debidamente calificada.
- Antes de conectar la hornilla a la red de suministro eléctrico, compruebe que:
1. El sistema doméstico de cableado sea apropiado para la potencia requerida por la hornilla.
 2. La tensión corresponda al valor indicado en la placa de características.
 3. La sección de cable de la fuente de alimentación pueda resistir la carga indicada en la placa de características.
- A fin de conectar la hornilla a la red de suministro eléctrico, no utilice adaptadores, reductores ni dispositivos de derivación, ya que estos pueden causar un sobrecalentamiento e incluso hasta un incendio.
- El cable de alimentación no deberá tocar ninguna pieza caliente, y además debe ir colocado de tal modo que su temperatura en ningún momento supere los 75 °C.
-  Consulte con un electricista para averiguar si su sistema doméstico de cableado resulta apropiado sin realizarle ninguna alteración.
- En todo caso, toda eventual alteración deberá ser realizada únicamente por un electricista calificado.

- Si el electrodoméstico que eliges tiene un número total de unidades de calefacción igual o superior a 4, se puede conectar directamente a la red eléctrica mediante una conexión monofásica, tal como se muestra a continuación.
- Si el cable está dañado o necesita ser reemplazado, esta operación debe ser realizada por un agente de servicio postventa utilizando herramientas especializadas para evitar accidentes.
- Si el electrodoméstico se conecta directamente a la red eléctrica, se debe instalar un interruptor de circuito omnipolar con una apertura mínima de 3mm entre los contactos.
- El instalador debe asegurarse de que se ha realizado correctamente la conexión eléctrica y que cumple con las normas de seguridad.
- El cable no debe doblarse ni comprimirse.
- El cable debe ser revisado regularmente y solo técnicos autorizados deben reemplazarlo.

ELIMINACIÓN Y RECICLAJE

Instrucciones importantes Para La Protección Del Medio Ambiente

Cumplimiento de la normativa RAEE y eliminación del producto de desecho:
Este producto cumple con la normativa RAEE de la UE (2012/19/UE). Este producto lleva el símbolo de clasificación de residuos de aparatos eléctricos y electrónicos (RAEE).

Este símbolo indica que este producto no debe eliminarse con otros residuos domésticos al final de su vida útil. El aparato usado debe ser devuelto a un punto de recogida oficial para el reciclaje de aparatos eléctricos y electrónicos. Para encontrar estos sistemas de recogida, póngase en contacto con las autoridades locales o con el distribuidor donde compró el producto. Cada hogar desempeña un papel importante en la recuperación y el reciclaje de los aparatos viejos. La eliminación adecuada de los electrodomésticos usados ayuda a evitar posibles consecuencias negativas para el medio ambiente y la salud humana.

Cumplimiento De La Normativa RoHS

El producto que ha adquirido cumple con la normativa RoHS de la UE (2011/65/UE). No contiene materiales nocivos ni prohibidos especificados en la misma.

ES

Información Del Embalaje

Los materiales de embalaje del producto están fabricados con materiales reciclables de acuerdo con nuestra normativa nacional de medio ambiente. No elimine los materiales de embalaje junto con los residuos domésticos o de otro tipo. Llévelos a los puntos de recogida de materiales de embalaje designados por las autoridades locales.

AVISO SOBRE LA PROTECCIÓN DE DATOS

Para la prestación de los servicios acordados con el cliente, nos comprometemos a cumplir sin restricciones todas las estipulaciones de la legislación aplicable en materia de protección de datos, en consonancia con los países acordados en los que se prestarán los servicios al cliente, así como, en su caso, el Reglamento General de Protección de Datos de la UE (GDPR).

Por lo general, nuestro tratamiento de datos tiene por objeto cumplir nuestra obligación contractual con usted y, por razones de seguridad del producto, salvaguardar sus derechos en relación con la garantía y las cuestiones de registro del producto. En algunos casos, pero sólo si se garantiza una protección adecuada de los datos, los datos personales podrían transferirse a destinatarios situados fuera del Espacio Económico Europeo.

Puede solicitar más información al respecto. Puede ponerse en contacto con nuestro encargado de la protección de datos a través de **MideaDPO@midea.com**. Para ejercer sus derechos, como el de oponerse al tratamiento de sus datos personales con fines de marketing directo, póngase en contacto con nosotros a través de **MideaDPO@midea.com**. AVERTISSEMENT : Assurer une ventilation adéquate

Pour permettre l'évacuation pratique des liquides, il est nécessaire de maintenir une distance minimale de 40 mm entre le déflecteur et le bas de la table de cuisson. Suivez les exigences ci-dessous.

- ⚠ Il y a des trous de ventilation autour de l'extérieur de la table de cuisson. VOUS DEVEZ vous assurer que ces trous ne sont pas obstrués par le plan de travail lorsque vous placez la table de cuisson.
- ⚠ • Notez que la colle qui joint le matériau plastique ou en bois au meuble doit résister à une température d'au moins 150°C pour éviter le décollage du revêtement.
• Par conséquent, le mur arrière, les surfaces adjacentes et environnantes doivent pouvoir supporter une température de 90°C.

Avant d'installer la plaque de cuisson, vérifier que

- Le plan de travail est carré et à niveau, et aucun élément structurel n'interfère avec l'espace nécessaire.
- Le plan de travail est fabriqué dans une matière résistante à la chaleur et isolée.
- Si la table de cuisson est installée au-dessus d'un four, ce dernier est équipé d'un ventilateur de refroidissement intégré.
- L'installation sera conforme à toutes les exigences en termes de dégagement et aux normes et réglementations applicables.
- Un interrupteur d'isolation approprié permettant une déconnexion totale de l'alimentation secteur est incorporé dans le câblage permanent, monté et positionné de manière à respecter les normes et réglementations locales en matière de câblage.
- L'interrupteur d'isolation doit être d'un type agréé et assurer une séparation des contacts par entrefer de 3 mm dans tous les pôles (ou dans tous les conducteurs actifs [phase] si les normes de câblage locales permettent cette variation des exigences).
- L'interrupteur d'isolation sera facilement accessible par le client lorsque la plaque de cuisson sera installée.
- En cas de doute sur l'installation, consulter les autorités et les règlements locaux en matière de construction.
- Des finitions résistantes à la chaleur et faciles à nettoyer (comme des carreaux de céramique) sont utilisées pour les surfaces murales entourant la table de cuisson.

Après installation de la plaque de cuisson, vérifier que

- Le câble d'alimentation n'est pas accessible via les portes d'armoire ou les tiroirs.
- Il y a un flux d'air frais suffisant depuis l'extérieur de l'armoire vers la base de la plaque de cuisson.
- Si la plaque de cuisson est installée au-dessus d'un tiroir ou d'un placard, une barrière de protection thermique est installée sous la base de la plaque de cuisson.
- L'interrupteur d'isolation sera facilement accessible par le client.

Avant de placer les supports de fixation

L'appareil doit être placé sur une surface stable et lisse (utiliser l'emballage au besoin). Ne pas forcer sur les commandes qui dépassent de la plaque de cuisson.

Précautions à prendre

1. La plaque à induction doit être installée par du personnel ou des techniciens qualifiés. Nous disposons de professionnels à votre service. Merci de ne jamais effectuer l'opération par vous-même.
2. La plaque de cuisson ne devra pas être installée directement au-dessus d'un lave-vaisselle, d'un réfrigérateur, d'un congélateur, d'un lave-linge ou d'un sèche-linge, car l'humidité pourrait endommager les composants électroniques de la plaque.
3. La plaque de cuisson par induction doit être installée de manière à assurer un rayonnement optimal de la chaleur afin d'améliorer sa fiabilité.
4. Le mur et la zone de cuisson induite au-dessus de la surface de travail doivent résister à la chaleur.
5. Pour éviter tout dommage, les couches intermédiaires et adhésives doivent être résistantes à la chaleur.
6. Ne pas utiliser un nettoyeur à vapeur.

Raccordement de la table de cuisson au réseau électrique

 Cette plaque de cuisson ne doit être raccordée au réseau électrique que par une personne dûment qualifiée. Avant de connecter la plaque de cuisson au réseau électrique, vérifier que:

1. Le système de câblage domestique est adapté à la puissance consommée par la table de cuisson.
2. La tension correspond à la valeur indiquée sur la plaque signalétique.
3. Les sections de câble d'alimentation peuvent supporter la charge indiquée sur la plaque signalétique.

Pour raccorder la table de cuisson au réseau électrique, ne pas utiliser d'adaptateurs, de réducteurs ou de dispositifs de dérivation, cela pouvant provoquer une surchauffe ou un incendie. Le câble d'alimentation ne doit pas entrer en contact avec les parties chaudes et doit être placé de manière à ce que sa température ne dépasse jamais 75°C.

 Vérifier auprès d'un électricien si le système de câblage domestique est adapté sans modification nécessaire.

Toute modification ne doit être effectuée que par un électricien qualifié.

FR

- ⚠ Si le nombre total d'unités de cuisson de l'appareil que vous choisissez n'est pas inférieur à 4, l'appareil peut être raccordé directement au réseau par une connexion électrique monophasée, comme indiqué ci-dessous.
- Si le câble est endommagé ou doit être remplacé, cela doit être fait par un service après-vente en utilisant les outils appropriés, afin d'éviter tout accident.
- Si l'appareil est connecté directement au réseau électrique, un disjoncteur omnipolaire doit être installé avec un écart minimum de 3 mm entre les contacts.
- L'installateur doit veiller à ce que la connexion électrique soit correcte et qu'elle est conforme aux normes de sécurité.
- Le câble ne doit pas être plié ou compressée.
- Le câble doit être vérifiée régulièrement et remplacé uniquement par une personne dûment qualifié.

MISE AU REBUT ET RECYCLAGE

Consignes importantes pour l'environnement

Conformité avec la Directive DEEE et Elimination des Produits Usagés :

Ce produit est conforme à la directive européenne DEEE (2012/19/EU). Ce produit porte un symbole de classification pour les déchets d'équipements électriques et électroniques (DEEE).

Ce symbole indique que ce produit ne doit pas être éliminé avec les autres déchets ménagers au terme de sa vie utile. L'appareil usagé doit être remis à un point de collecte officiel pour le recyclage des appareils électriques et électroniques. Afin de trouver ces systèmes de collecte, merci de contacter les autorités locales ou le détaillant où le produit a été acheté. Chaque ménage joue un rôle important dans la récupération et le recyclage des vieux appareils. Une élimination appropriée des appareils usagés permet de prévenir les conséquences potentiellement néfastes pour l'environnement et la santé humaine.

Conformité avec la directive RoHS

Le produit que vous avez acheté est conforme à la directive européenne RoHS (2011/65/EU). Il ne contient pas de matériaux nocifs et interdits spécifiés dans la directive.

FR

Informations sur le paquet

Les matériaux d'emballage du produit sont fabriqués à partir de matériaux recyclables, conformément aux réglementations environnementales nationales. Ne pas jeter les matériaux d'emballage avec les déchets domestiques ou autres. Les apporter aux points de collecte des matériaux d'emballage désignés par les autorités locales.

AVIS SUR LA PROTECTION DES DONNEES

Dans le cadre de la fourniture des services convenus avec le client, nous acceptons de nous conformer sans restriction à toutes les stipulations de la loi sur la protection des données applicable, conformément aux pays convenus dans lesquels les services au client seront fournis, ainsi que, le cas échéant, au Règlement Général sur la Protection des Données (RGPD) de l'UE.

En règle générale, notre traitement des données vise à remplir notre obligation contractuelle envers vous et, pour des raisons de sécurité des produits, à préserver vos droits dans le cadre des questions de garantie et d'enregistrement des produits. Dans certains cas, mais uniquement si une protection appropriée des données est assurée, les données à caractère personnel peuvent être transférées à des destinataires situés en dehors de l'Espace Economique Européen.

De plus amples informations sont fournies sur demande. Vous pouvez contacter notre Délégué à la Protection des Données à l'adresse **MideaDPO@midea.com**. Pour exercer vos droits, tels que le droit d'opposition au traitement de vos données personnelles à des fins de marketing direct, merci de nous contacter via **MideaDPO@midea.com**.

Service Client

Votre produit bénéficie d'une garantie légale de conformité de 2 ans.

En cas de question, veuillez contacter notre centre de service client local.
